

Suzukii Trap[®]

FOOD ATTRACTANT FOR THE CAPTURE OF *DROSOPHILA SUZUKII*

What is it? What is it for?

Suzukii Trap[®] is a specific food attractant for the capture of *Drosophila suzukii* composed of peptides and organic acids with a high attractive power. It is an organic solution that does not need any insecticide, neither in the formulation itself nor in its subsequent use in the field. The effectiveness of the system is guaranteed as long as there is an attractant in liquid form. The durability of this can vary depending on the time of year and local weather.

Benefits

- Product ready to use.
- Does not leave residues in the fruits.
- It does not contain pheromones or insecticide in its composition or in its form of use.
- Product suitable for its use in organic farming according to EU standard 2021/1165. Control Ecocert SA F-32600.

CROPS

Crops affected by *Drosophila suzukii* are mainly soft fruits: Cherries, Strawberries, Plums, Berries, Figs, Grapes, etc. In addition to wild berries that serve as a reservoir when there is no susceptible crop.

MOMENT OF USE

Place the attractant in traps suitable for catching fruit flies. The traps should be hung at the level of the crop, at least 25 cm from the ground. It is advisable to keep them as a monitoring throughout the year, since the adult form of this pest can survive in winter conditions. During the winter, place the traps reinforcing the perimeters of the plot and the most humid areas.

GUARANTEED ANALYSIS

	(W/W)	(W/V)
Hydrolyzed proteins	2%	2.04%
Organic acids	5%	5.1%
